SUMMARY (PROFILE/PROJECTS):

I am an android developer, using Android studio and frameworks like flutter to develop android applications that meet user's needs and requirements. I have experience in developing android applications using both Java (2+ years) and Kotlin (1+years). I have been able to develop several applications using the two languages.

While working at Tech and Beyond, I developed and managed an application that helped in monitoring the transactions and other activities in a weighbridge station.

In my time at Flair Edge, I have developed sustainable software that meets user's requirements and needs. I worked on a system to digitize the process of locating house units to rent, fumigators and cleaners dubbed SmartHama.
